PUBLIC PRICE : 576 €
(with contract satisfied / refunded)

Airfield - 57970 YUTZ - 03 82 56 63 71 loravia@wanadoo.fr - www.loravia.com

Principle of operation:

The water thermostat type 3 lanes allows an increase in rapid temperature coolant
(Allow 4-5 minutes max. In winter)
it regulates the temperature of the liquid at about 80 °C.
The exchanger water / oil will allow rapid heating oil and regulating its temperature by the simple fact that the liquid Cooling is stabilized at 80 °C.
The oil temperature is stabilized between 90 and 110 °C.

Dismount your oil radiator
